

Expert Analysis of ESG Reporting and Sustainability Disclosures: Naspers Limited (2014–2023)

The company identified by the stock ticker NPNJn.J is Naspers Limited, a global consumer internet group and one of the largest technology investors in the world.¹ Naspers is a South African multinational holding company with a primary listing on the Johannesburg Stock Exchange (JSE) and a secondary listing on the A2X.² The ticker NPNJn.J specifically corresponds to the Reuters Instrument Code (RIC) for the company’s ordinary shares traded on the JSE.¹ Confident identification is established through multiple financial data providers, including LSEG (Refinitiv), Bloomberg, and the company’s own investor relations disclosures.¹

Company Identification and Sectoral Context

Naspers Limited, incorporated in 1915 and headquartered at 40 Heerengracht, Cape Town, South Africa, serves as a prominent investment holding company with operations spanning Africa, Asia, Europe, and Latin America.² Its primary business activities involve investing in and operating platforms across several high-growth sectors, including classifieds, food delivery, payments and fintech, education technology (edtech), and health technology.⁵ The group is perhaps most recognized for its significant strategic stake in the Chinese technology conglomerate Tencent, held through its international internet assets subsidiary, Prosus N.V., which is listed on Euronext Amsterdam.⁵

In the South African domestic market, Naspers retains significant media interests through Media24, which operates in digital media, newspapers, magazines, and book publishing.² Historically, the company has been classified under the "Retail" or "Broadline Retail" sector by index providers like S&P Global and FTSE Russell, although its operational reality as a technology conglomerate often aligns it with the "Technology" or "Software & IT Services" industry classification in financial databases.² As of 2023, the group’s market capitalization remains a central pillar of the JSE, with its ESG profile becoming a critical driver of investment sentiment and valuation.²

Metric	Details	Source
Legal Name	Naspers Limited	²

Primary Business Activity	Consumer Internet, Technology Investing, and Media	2
Headquarters Location	40 Heerengracht, Cape Town, 8001, South Africa	4
Primary Stock Exchange	Johannesburg Stock Exchange (JSE)	2
Sector Classification	Technology / Retail / Multimedia & Graphics Software	2
Industry Classification	Internet Media & Services / Broadline Retail	2

The identification of Naspers Limited via the NPNJn.J ticker is unambiguous within the context of the South African equity market. While various entities within the group, such as Prosus N.V. (PRX), share management teams and mirrored governance structures, the NPNJn.J ticker specifically refers to the parent holding company listed in Johannesburg.³

ESG Report Timeline Analysis (2014–2023)

The evolution of ESG reporting at Naspers between 2014 and 2023 reflects a strategic transition from traditional corporate social responsibility (CSR) toward a sophisticated, framework-aligned sustainability disclosure model. This period is characterized by the adoption of international standards and the progressive integration of ESG metrics into financial and operational governance.

The Formative Phase of Disclosure (2014–2016)

In 2014, Naspers produced an Integrated Annual Report that prioritized compliance with the South African King III Code of Corporate Governance.¹² At this stage, the company's ESG focus was primarily articulated through the lens of "Balancing Profit, People, and Planet," with heavy emphasis on the "Planet" pillar through basic environmental management and the "People" pillar through Broad-Based Black Economic Empowerment (B-BBEE) initiatives in South Africa.¹² The 2014 Socially Responsible Investment (SRI) Index review by the JSE, which assessed all constituents of the FTSE/JSE All Share Index using publicly available information, included Naspers as a constituent.¹³ This early participation in the SRI Index signaled an emerging commitment to transparency, although disclosures remained largely qualitative and centered

on domestic South African requirements rather than global standards.¹⁴

The year 2015 marked a significant structural shift in how ESG performance was measured in the South African context. The JSE partnered with FTSE Russell to launch the FTSE/JSE Responsible Investment Index, replacing the previous SRI Index.¹⁶ This transition required companies to undergo a more rigorous ESG rating process based on over 300 individual indicator assessments.¹⁶ Naspers maintained its inclusion in these indices, which required a minimum ESG score of 2.9 for eligibility.¹⁶ Internally, the 2015 Integrated Report expanded its focus on "Sustainable Investment," highlighting the group's role as a long-term investor in technology that addressed societal needs.¹⁹

By 2016, the company's financial and non-financial reporting began to merge more closely under the integrated reporting (IR) framework pioneered by the International Integrated Reporting Council (IIRC). The 2016 summarized consolidated financial results were audited by PricewaterhouseCoopers (PwC), with Brendan Deegan serving as the lead auditor.²¹ While the 2016 report did not yet explicitly adopt the GRI Standards, it laid the groundwork for future assurance by refining data collection for core environmental and social KPIs.²¹

Global Standard Alignment and Framework Adoption (2017–2019)

The period from 2017 to 2019 represented a significant leap in technical maturity for Naspers' sustainability reporting. In 2017, the Integrated Annual Report was prepared with reference to the Global Reporting Initiative (GRI) G4 Guidelines, which provided a more granular and comparable structure for non-financial data.²² A critical milestone was achieved when PwC provided a limited assurance engagement on selected sustainability information for the 2017 financial year.²² This assurance covered specific indicators such as carbon footprint (Scope 1, 2, and 3 emissions), energy consumption, and workforce diversity metrics.²² The board's statement of responsibility for the integrated report in 2017 emphasized that the directors had applied their collective mind to the document, reinforcing ESG oversight at the highest governance level.²²

In 2018, the global ESG landscape for tech companies shifted with the introduction of new materiality maps and rating methodologies. Sustainalytics launched its ESG Risk Ratings in October 2018, which moved beyond simple transparency to measure "unmanaged" ESG risk.²³ Naspers was integrated into this new rating universe, which highlighted issues such as data privacy and security as top-tier material risks for the group.²⁵ The 2018 Integrated Report also saw the company begin to align its disclosures with the United Nations Sustainable Development Goals (SDGs), identifying specific areas where its technology investments could contribute to global challenges.¹⁷

In 2019, the group underwent a significant corporate restructuring with the listing of Prosus N.V. on Euronext Amsterdam.¹¹ This led to a mirroring of governance structures between Naspers and Prosus, with both entities adopting a one-tier board structure and identical committees for

audit, risk, and sustainability.¹¹ The 2019 reporting cycle also saw the first internal preparations for adopting the Task Force on Climate-related Financial Disclosures (TCFD) and the Sustainability Accounting Standards Board (SASB) frameworks, as investor demand for climate and industry-specific metrics intensified.²⁶

Institutionalization of ESG and Climate Leadership (2020–2023)

The most recent phase of the timeline is defined by the absolute institutionalization of ESG within the group's financial and operational strategy. FY2020 was designated as the base year for the group's climate target setting, providing a baseline for a multi-year decarbonization pathway.²⁷ This was followed in 2021 by the publication of the group's first comprehensive TCFD report and SASB reference table.¹⁰ The 2021 reports identified the Internet Media & Services industry standards as the most relevant for Naspers, focusing on data privacy, advertising standards, and human capital.¹⁰

In 2022, Naspers took the innovative step of linking executive remuneration directly to ESG goals.³⁰ The short-term incentive (STI) structure for the CEO and CFO was modified to include environmental and social targets, such as achieving zero Scope 1 and 2 emissions at the corporate headquarters and improving the share price discount relative to net asset value (NAV).³⁰ This linkage was a direct response to shareholder pressure for greater accountability and transparency in executive pay.³⁰ The group also obtained limited assurance from PwC for four consecutive reporting years (FY20 to FY23) for its carbon emissions data, highlighting a sustained commitment to data integrity.²⁷

By 2023, Naspers' sustainability transparency reached a pinnacle with the attainment of an "A-" score from CDP (formerly the Carbon Disclosure Project) in the Climate Change category.³² This score placed the company in the "Leadership" band, indicating that it was implementing current best practices in climate governance.³⁴ Furthermore, in late 2023, Naspers and Prosus finalized the removal of their complex cross-holding structure, a move heralded as a major governance victory that simplified the investment case for both entities and enhanced transparency for shareholders.³

Detailed Analysis of ESG Frameworks and Performance

Naspers Limited utilizes a "layered" approach to ESG reporting, employing different frameworks to satisfy the unique requirements of diverse stakeholder groups. This section provides a technical analysis of how these frameworks are applied and what the data reveals about the company's performance.

Global Reporting Initiative (GRI) and the GRI 2021 Standards

Naspers has transitioned its sustainability reporting to align with the GRI 2021 Standards, which emphasize the concept of impact materiality.³⁵ The GRI framework allows the group to provide a "GRI Content Index," which serves as a roadmap for stakeholders interested in the group's impacts on the economy, environment, and society.³⁵

GRI Standard	Disclosure Topic	Reported Performance / Location
GRI 2-1	Organizational details	HQ in Cape Town; Governance pages 75-76
GRI 2-5	External assurance	Limited assurance by PwC; Management overview page 147
GRI 2-23	Policy commitments	Group Sustainability Policy; Code of Business Ethics
GRI 302	Energy consumption	1,054 MWh (FY23); 30% renewable electricity
GRI 305	GHG Emissions	Scope 1: 22 <i>tCO₂e</i> ; Scope 2: 567 <i>tCO₂e</i> (FY23)
GRI 401	Employment	Workforce metrics provided in Sustainability Review

Data Source:..²⁸ The transition to the GRI 2021 Standards has required Naspers to engage in a "double-materiality" process, which considers both how sustainability issues impact the company's financial value and how the company's activities impact people and the planet.³⁶

This shift has led to more detailed reporting on "Workers in the Value Chain," particularly for the on-demand platform workers in its food delivery and e-tail segments.³⁶

Sustainability Accounting Standards Board (SASB) Disclosure

Naspers recognizes that for financial market participants, ESG data must be industry-specific and financially material. To meet this need, the group has adopted the SASB standards for the "Internet Media & Services" industry.¹⁰ This framework is narrower than GRI and focuses on the subset of ESG issues most likely to impact a company's financial condition or operating performance.³⁸

The group's SASB reference table focuses on three primary areas:

1. **Data Privacy and Advertising Standards:** Naspers maintains a group-level policy on data privacy governance that sets minimum standards for its majority-owned businesses.²⁹ The 2024 SASB report emphasizes that subsidiary companies do not sell personal data to third parties.²⁹
2. **Intellectual Property and Freedom of Expression:** As a major investor in internet platforms, the group must navigate complex regulations regarding content moderation and freedom of expression.¹⁰
3. **Data Security:** The group's approach to cybersecurity centers on a multi-layered defense strategy, with oversight from the board-level Risk Committee.¹¹

Task Force on Climate-related Financial Disclosures (TCFD)

The TCFD framework is used by Naspers to describe its climate governance and the resilience of its business model to climate change.²⁶ The group's TCFD disclosures are particularly detailed regarding "Transition Risks," such as the potential for carbon taxes to increase the operating costs of its delivery fleets.³⁹

Naspers has set several Science-Based Targets (SBTi) as part of its TCFD commitment:

- **Operational Emissions:** 100% reduction in absolute Scope 1 and 2 GHG emissions by FY2028 from an FY2020 base year.⁴⁰
- **Supply Chain:** 30% reduction in absolute corporate Scope 3 emissions from air business travel by FY2030 from an FY2020 base year.⁴⁰
- **Portfolio Influence:** 50% of portfolio companies (by invested capital) to have set their own science-based reduction targets by FY2030.⁴⁰

The group reports that its commercial strategy increasingly underpins its climate agenda, with a capital-allocation strategy that favors asset-light, low-carbon business models.²⁸ However, the 2023 increase in Scope 2 emissions—caused by moving to a larger office facility—highlights the challenges of maintaining a downward trajectory during periods of growth.²⁷

Governance Performance: King IV and Remuneration

As a JSE-listed entity, Naspers must adhere to the King IV Code of Corporate Governance.¹¹ The group's 2023 King IV Governance Register demonstrates high levels of compliance, particularly regarding Principle 1 (Ethical Leadership) and Principle 16 (Stakeholder Relationships).¹¹

A critical evolution in Naspers' governance has been the inclusion of a "discount-related" incentive in executive remuneration.³¹ This unique mechanism incentivizes the CEO and CFO to reduce the significant discount between the Naspers share price and its net asset value (NAV).³¹ In FY2023, the discount was reduced from 58% to 42%, which the company credits to its aggressive share repurchase program.³¹ This integration of a financial governance metric into the ESG/remuneration framework represents a sophisticated approach to addressing investor concerns about holding company structures.

Governance Component	Status / Detail	Source
Board Structure	Identical one-tier board for Naspers and Prosus	11
ESG Oversight	Social, Ethics and Sustainability Committee	11
Remuneration Link	STIs linked to carbon reduction and NAV discount	30
Diversity Policy	Regular pay equality analysis; diversity in management	25

ESG Ratings and Third-Party Assessments

External ratings are a primary mechanism for the market to verify Naspers' internal ESG claims. Over the 2014–2023 period, the group has been under constant scrutiny from major ESG rating providers.

MSCI ESG Ratings: Resilience and Industry Peer Comparison

MSCI ESG Ratings assess Naspers on its exposure to and management of industry-specific ESG risks.⁴² MSCI uses a letter-based scale (AAA to CCC) to categorize companies.⁴² For a company in the technology and retail sectors, MSCI typically weights "Corporate Governance"

and "Data Privacy" more heavily than "Environmental" factors.⁴³

Historically, companies with higher MSCI ESG ratings have shown better long-term earnings growth and lower stock price volatility.⁴⁴ Naspers’ inclusion in the MSCI ACWI ESG Screened and MSCI ACWI SRI indices serves as an important benchmark for global investors seeking ESG-integrated portfolios.⁴⁵ However, MSCI’s rating models have undergone several updates—most notably on January 1, 2015—which increased the weighting of "Corporate Behavior" and replaced the Audit Key Issue with an "Accounting" Key Issue, reflecting a post-scandal focus on financial reporting integrity.⁴⁷

Sustainalytics: Unmanaged Risk Decomposition

Sustainalytics provides a different perspective by measuring the magnitude of "unmanaged" ESG risk.²³ Naspers is evaluated based on its "Exposure" to risk and the quality of its "Management" of that risk.⁴⁹

As of the 2023 reporting cycle, Sustainalytics’ methodology provides a detailed breakdown of Naspers’ risk profile:

- **Total Exposure:** Determined by the sub-industries in which Naspers operates (e.g., Internet Media & Services).⁴⁹
- **Manageable Risk:** The portion of exposure that can be mitigated through corporate programs and policies.⁴⁹
- **Managed Risk:** The actual effectiveness of the group’s policies and practices, verified through data points and incident monitoring.⁴⁹
- **Management Gap:** The residual risk that could be managed but currently is not, often influenced by "incidents" or controversies.²³

Sustainalytics notes that while tech firms like Naspers often have strong "Management" scores, their "Exposure" to data security and competition risks remains high, leading many to fall into the "Medium" or "High" risk categories compared to broader market averages.²⁵

CDP Climate Change Scores

Naspers’ participation in the CDP Climate Change questionnaire has become a central part of its environmental transparency strategy.³² CDP scores represent a comprehensive assessment of a company’s environmental performance, covering carbon emissions, climate change resilience, and water management.⁵¹

Year	Program	Status	Score

2023	Climate Change	Submitted	A-
2022	Climate Change	Submitted	B
2021	Climate Change	Submitted	B
2020	Climate Change	Submitted	C

Data Source:..³² The progression from a "C" in 2020 to an "A-" in 2023 demonstrates the group's "Leadership" in climate transparency and action.³⁴ An "A-" status indicates that Naspers is not only aware of its climate impacts but is also implementing current best practices to mitigate them.³⁴ The group also submits questionnaires for "Forests" and "Water Security," although its performance in these areas has historically lagged behind its climate change reporting.³²

Material Controversies and Strategic ESG Risks

The decade from 2014 to 2023 was marked by several critical ESG-related controversies that impacted Naspers' valuation and reputation. An expert analysis requires examining these events beyond their financial surface to understand the underlying governance and social implications.

The Tencent and China Regulatory Paradox

The group's most significant strategic risk is its concentration in the Chinese technology sector through Tencent.⁶ Starting in late 2020, Chinese authorities launched a series of unpredictable and stringent regulatory crackdowns on the tech industry, focusing on anti-monopoly measures, data security, and social issues like youth gaming addiction.⁶

In December 2023, the announcement of harsh new restrictions on the gaming sector wiped \$54 billion off Tencent's market value in a single day, causing Naspers and Prosus shares to fall by more than 12%.⁶ From an ESG perspective, this highlights a profound "Social" and "Governance" risk: the group is heavily exposed to a regulatory environment where government interventions can fundamentally alter business models overnight.⁶ This has led to a persistent "discount" on the stock, as investors remain wary of potential further interventions.⁶

Governance of Cross-Holdings and the Voting Discount

For much of the decade, Naspers' governance was complicated by a cross-holding structure with its subsidiary, Prosus.³ This structure was initially designed to manage the group's size on the JSE but was criticized by many institutional investors for its complexity and the potential for skewed voting outcomes.³ The disparity between economic interest and voting control—a hallmark of the dual-class share structure (A-shares and N-shares)—remains a point of contention with governance rating agencies.²

The board's decision to remove the cross-holding structure in late 2023 was a direct attempt to address these governance concerns.³ By simplifying the structure and increasing the investability weighting of the shares, Naspers sought to demonstrate that it was listening to shareholder feedback and prioritizing transparent corporate governance.³

Platform Ethics and Data Privacy

As the operator of platforms that serve billions of people, Naspers faces ongoing risks related to competitive behavior and data privacy.⁵³ In 2023 alone, the technology sector saw a rise in "Competitive Behavior" controversies, with several global peers scrutinized for antitrust violations and digital advertising dominance.⁵³ While Naspers has not faced the same level of individual fines as firms like Meta or Google, its diverse portfolio of e-commerce and fintech businesses remains vulnerable to the evolving "Social" risks of digital advertising and user data exploitation.⁵³

South African Social Dynamics: B-BBEE and Labor

In its domestic operations, Naspers must navigate the complex social landscape of South Africa.²⁷ The group's social strategy is heavily influenced by the B-BBEE mandate, which requires companies to contribute to the economic empowerment of previously disadvantaged individuals.²⁶ Naspers Labs, the group's flagship social impact program, addresses the critical "Social" issue of youth unemployment by providing digital skills development to thousands of young South Africans.²¹ However, the 2023 decision by Media24 to close certain print titles (e.g., City Press) in response to the digital shift highlights the "Social" challenge of a "Just Transition," where traditional jobs are lost to technology-driven transformation.⁸

Environmental and Emissions Data Summary (FY20–FY23)

A core requirement for verifiable ESG reporting is the disclosure of greenhouse gas (GHG) inventory data. Naspers has tracked and audited its carbon emissions data annually since the FY2020 base year.²⁷

Emission Category	FY2020	FY2021	FY2022	FY2023	Trend Analysis
Scope 1 (<i>tCO_{2e}</i>)	38	17	20	22	Downward trend from base; stabilized ²⁸
Scope 2 (Market-based)	116	52	67	567	Significant increase in FY23 due to office move ²⁷
Scope 3 (Business Travel)	1,496	20	92	422	Volatile; recovering toward pre-pandemic levels ²⁷
Total Energy (MWh)	293	213	303	1,054	Increase driven by larger office facility ²⁸
Renewable Energy (%)	10%	24%	42%	30%	Target set for 100% by FY24/25 ²⁷

The group's Scope 1 emissions are largely due to fossil fuel-based vehicles in its corporate fleet.²⁷ In FY2023, the group set a target to reduce Scope 1 emissions to zero by replacing internal combustion engine vehicles with electric vehicles at the corporate office.²⁷ The dramatic increase in Scope 2 emissions from 67 *tCO_{2e}* in FY22 to 567 *tCO_{2e}* in FY23 reflects the operational footprint of a much larger new office facility meant to serve a larger workforce.²⁷ To reach its target of zero Scope 2 emissions, the group engaged in solar panel installation and the procurement of renewable energy certificates for all remaining consumption.²⁷

Reference Table with Credibility Assessment

The following table summarizes the primary sources used in this analysis, with a structured

assessment of their credibility based on transparency, authority, and recency.

#	Reference (APA 7th edition format)	Source Type	Credibility Score	Justification for Score	Relevance
1	Naspers Limited. (2023). <i>Integrated Annual Report 2023.</i>	Primary (Official)	10	Board-appro ved; audited financial and non-financial data; filed with regulators.	Core source for timeline and performance.
2	Naspers Limited. (2023). <i>Environmenta l Impact Report FY23.</i>	Primary (Official)	10	Contains audited emissions data and limited assurance statement from PwC.	Critical for environmental data verification.

Transparency & Limitations

This analysis is based on data available as of the knowledge cutoff in March 2026. While the report aims for exhaustive detail, several inherent limitations must be acknowledged.

Data Gaps and Cutoff Limits

- Knowledge Cutoff:** The analysis incorporates corporate reports and ratings through the end of 2025, but some real-time data from the 2026 reporting cycle may be incomplete or subject to future revision.⁴
- Assurance Scope:** While Naspers obtains "limited assurance" for its carbon emissions and selected KPIs, this is not equivalent to the "reasonable assurance" applied to financial statements.²² Some qualitative claims regarding social impact remain unverified by third-party auditors.

- **Paywalled Data:** Deep historical data from premium ESG rating terminals (e.g., Bloomberg ESG or Refinitiv) may contain more granular sub-scores not fully available in public disclosures.¹
- **Portfolio Transparency:** As an investment holding company, Naspers has limited control over the reporting practices of its minority investments (e.g., Tencent, Swiggy, or Delivery Hero).²⁷ While the group pushes for alignment with its ESG standards, the level of transparency at the individual portfolio level varies significantly.¹⁰

Verification Recommendations

For users seeking to independently verify the information presented in this report, the following external databases are recommended:

1. **Naspers Investor Relations Archive:** The most authoritative source for all integrated annual reports and non-financial disclosures (naspers.com/investors).²⁶
2. **JSE SENS (Stock Exchange News Service):** For official notifications regarding corporate governance, index changes, and the removal of the cross-holding structure (jse.co.za).
3. **CDP Public Database:** To view the full public responses and detailed category scores for Naspers' climate change disclosures (cdp.net).⁵¹

Synthesis and Expert Outlook

The decade of ESG development for Naspers Limited (2014–2023) demonstrates a company grappling with its identity as a traditional media firm transforming into a global technology powerhouse. The transition from local South African governance compliance (King III) to global climate and industry frameworks (TCFD, SASB) has made Naspers a benchmark for emerging market ESG disclosure.

The most profound evolution is not the adoption of the frameworks themselves, but the structural integration of sustainability into the group's financial logic. Linking the CEO's remuneration to the "NAV discount" and "Scope 1 & 2 reductions" addresses both the financial governance "holding company discount" and the environmental imperatives of the Paris Agreement simultaneously. This holistic approach to integrated thinking is rare in the emerging markets and places Naspers at the forefront of ESG innovation.

However, the "Tencent Factor" remains an overarching geopolitical and governance risk that no amount of reporting can fully mitigate. The unpredictability of the Chinese regulatory landscape means that Naspers' ESG profile will always be tied to events outside its direct control. For the discerning investor, the value of Naspers' ESG reporting lies in how it manages the *manageable* portion of this risk through rigorous data privacy governance, proactive climate action, and a simplified corporate structure. As the group moves toward its 2028 net-zero operational goal, the transparency of its multi-year decarbonization pathway will serve as the ultimate litmus test for its sustainability commitments.
