

Deep Analysis of the ESG Disclosure Framework and Sustainability Performance of Ambev S.A.

The entity identified by the stock ticker ABEV3.SA is Ambev S.A., a major publicly-held corporation organized under the laws of the Federative Republic of Brazil.¹ As a central player in the global beverage industry and the largest brewery in Latin America, Ambev S.A. operates as a key subsidiary of Anheuser-Busch InBev (AB InBev), which serves as its controlling shareholder.³ The company's legal identity and operational scope are deeply rooted in the history of the Brazilian industrial landscape, representing the evolution of two foundational nineteenth-century breweries, Brahma and Antarctica.³ This analysis provides an exhaustive review of the company's ESG reporting evolution, framework adoption, and performance milestones from 2014 through 2023.

Corporate Identity and Structural Evolution

Ambev S.A. is officially registered with the Brazilian National Corporate Taxpayers Register (CNPJ) under number 07.526.557/0001-00 and the Corporate Registration Identification Number (NIRE) 35.300.368.941.² The organization maintains its principal executive offices at Rua Dr. Renato Paes de Barros, 1017, 3rd floor, in São Paulo, Brazil.¹ Categorized within the Consumer Staples sector and the Beverages industry—specifically as a "Brewers" entity—the company's primary business activities involve the production, distribution, and commercialization of beer, carbonated soft drinks, non-alcoholic and non-carbonated beverages, as well as food and raw materials required for the beverage supply chain.³

The current corporate structure of Ambev S.A. is the result of a significant reorganization completed in 2013. Prior to this, the company operated as Companhia de Bebidas das Américas - Ambev (often referred to as "Old Ambev"). In July 2013, a stock swap merger was approved, which simplified the group's corporate structure and aimed at reducing operating costs.³ On October 30, 2013, the Brazilian Securities and Exchange Commission (CVM) granted the registration of Ambev S.A. as a category "A" securities issuer, and on November 11, 2013, its common shares began trading on the B3 S.A. - Brasil, Bolsa, Balcão (the Brazilian Stock Exchange) and its American Depositary Receipts (ADRs) on the New York Stock Exchange (NYSE).³

Identity Attribute	Specification	Verification Source
--------------------	---------------	---------------------

Legal Name	Ambev S.A.	1
Primary Ticker	ABEV3 (B3)	3
Secondary Ticker	ABEV (NYSE)	6
Business Activity	Production and trading of beer, soft drinks, and food raw materials.	3

Industry Classification	Brewers / Beverages	6
Controlling Shareholder	Anheuser-Busch InBev S.A./NV (AB InBev)	3
Official IR Website	https://ri.ambev.com.br/en/	5

The organization's geographic reach is divided into four major operating segments: Brazil (which includes Beer and NAB - Non-Alcoholic Beverages), Latin America South (LAS), Central America and the Caribbean (CAC), and Canada.³ This vast geographical footprint necessitates a complex and multi-layered ESG reporting strategy that addresses both localized environmental impacts and global corporate sustainability standards.

ESG Reporting Timeline and Framework Adoption (2014–2023)

The timeline of Ambev S.A.'s sustainability disclosures between 2014 and 2023 illustrates a transition from philanthropic narrative-based reporting to a sophisticated, data-driven ESG framework aligned with international investor expectations. This evolution was driven by both internal strategic shifts and external regulatory pressures, including CVM resolutions and international financial reporting standard convergences.

The Foundation of Modern Reporting: 2014–2016

During the first few years following the 2013 merger, Ambev's reporting was characterized by the consolidation of disparate sustainability initiatives into a unified annual disclosure. In 2014, the organization focused on harmonizing its socio-environmental indicators across its newly integrated regional operations.¹ This period saw the early adoption of the Global Reporting

Initiative (GRI) G4 guidelines, which emphasized the concept of "materiality"—the focus on reporting issues that significantly influence the assessments and decisions of stakeholders.¹¹

By 2016, a critical turning point occurred with the release of the first formal set of global standards for sustainability reporting by the GRI.¹³ Ambev transitioned from the G4 guidelines to these modular GRI Standards, which provided a more structured approach to disclosing impacts on the economy, environment, and people.¹⁴ This adoption signaled a move toward greater transparency and comparability for international investors.¹¹

Strategic Integration of Financial Materiality: 2017–2019

As the ESG landscape matured, the demand for information focused on "financial materiality" became more pronounced. In 2017, the Financial Stability Board's Task Force on Climate-related Financial Disclosures (TCFD) released its final recommendations, providing a framework for disclosing climate-related risks and opportunities.¹³ Ambev began the multi-year process of aligning its narratives with the TCFD's four thematic areas: Governance, Strategy, Risk Management, and Metrics and Targets.¹⁰

In 2018, the Sustainability Accounting Standards Board (SASB) standards were officially launched, offering industry-specific metrics designed to capture sustainability factors that affect enterprise value.¹³ Ambev adopted the SASB index for the "Beverages" industry, which forced a deeper analytical focus on water management, product safety, and packaging lifecycle.¹⁰ During 2019, the company's internal materiality matrix was updated to better reflect these financial materiality considerations, bridging the gap between social impact and shareholder value.¹⁰

Purpose-Driven Disclosures and Net Zero Commitments: 2020–2021

The year 2020 served as a catalyst for social pillar disclosures, as the pandemic required companies to report more transparently on employee safety and community resilience. Ambev utilized its 2020 reports to highlight its "Shared Prosperity" vision and the expansion of its VOA program, which mentored hundreds of NGOs in management practices.¹⁰

In 2021, the organization launched its new corporate purpose: "To create a future with more cheers".¹⁰ This year marked the announcement of its ambitious "Net Zero" commitment—targeting net-zero carbon emissions across its entire value chain (Scopes 1, 2, and 3) by 2040.¹⁰ The 2021 Annual and ESG Report was prepared in accordance with the GRI Standards: Essential option and included a dedicated SASB index and TCFD alignment section.¹⁰

Regulatory Alignment and Global Convergence: 2022–2023

By 2022, Ambev transitioned to the updated GRI 2021 Universal Standards, which introduced more rigorous requirements for human rights reporting and due diligence.¹⁷ This period was

also characterized by major regulatory milestones in the Brazilian market. In 2022, CVM Resolution 80 came into effect, mandating more structured ESG disclosures in the "Formulário de Referência" (Reference Form), the primary annual filing for Brazilian listed companies.³

The 2023 reporting cycle was heavily influenced by the global convergence of ESG standards under the International Sustainability Standards Board (ISSB). As the TCFD and SASB frameworks were consolidated into the IFRS Foundation, Ambev's disclosures began to anticipate the requirements of IFRS S1 and S2.¹³ The 2023 report focused on high-level circularity achievements, including the goal to eliminate plastic pollution from packaging in Brazil by 2025.¹⁷

Year	Milestone / Development	Description and Relevance	Frameworks Cited	Source
2014	Post-Merger Consolidation	Harmonization of environmental and social metrics across Brazilian and international segments.	Early GRI	³
2016	Transition to GRI Standards	Adoption of the modular GRI Standards for more rigorous impact disclosure.	GRI Standards	¹²
2017	TCFD Adoption	Integration of climate-related financial risk analysis into the corporate strategy.	TCFD	¹³

2018	SASB Implementation	First inclusion of industry-specific financial materiality metrics for the beverage sector.	SASB	10
2021	Net Zero Launch	Commitment to full value-chain decarbonization (Scopes 1-3) by 2040.	GRI, SASB, TCFD	10
2022	CVM Regulatory Shift	Compliance with CVM Resolution 80 for structured ESG disclosure in Reference Forms.	GRI 2021	3
2023	IFRS Alignment	Transitioning disclosure narratives to align with ISSB/IFRS sustainability standards.	IFRS S1/S2	13

Environmental Performance and Climate Strategy

Ambev's environmental strategy is built upon the dual pillars of operational efficiency and value-chain transformation. The company recognizes that its license to operate in water-stressed regions is intrinsically linked to its environmental stewardship.

Climate Action and Energy Transition

The "Net Zero" ambition announced in 2021 is the centerpiece of Ambev's climate strategy. The goal is to reach net-zero emissions in direct operations (Scopes 1 and 2) by 2030 and across

the full value chain (Scope 3) by 2040.¹⁰ This strategy relies heavily on the "decarbonization of operations," which includes the transition to 100% renewable electricity. By the end of 2021, the company achieved this milestone for all of its operations in Brazil.¹⁰

A notable achievement in 2021 was the announcement of the first carbon-neutral brewery in Brazil, located in Ponta Grossa (PR), along with a carbon-neutral malting plant in Passo Fundo (RS).¹⁰ These facilities achieved a 90% reduction in CO_2 emissions, with the remaining 10% neutralized through high-quality carbon offsets.¹⁰ By 2022, the company had reached a total of 11 carbon-neutral plants.¹⁷

Water Stewardship and Efficiency

Water is the primary ingredient in Ambev's products, making water stress a critical business risk. The company's water management strategy targets reducing water consumption within its plants while simultaneously restoring water in high-stress watersheds.¹⁶ In 2021, the organization reached its goal of reducing internal water consumption to 2.40 hectoliters of water per hectoliter of beer produced (hl/hl).¹⁰

To address risks beyond its operations, the company engages in restoration and conservation efforts across 100% of its high-risk sites.¹⁹ This includes nature-based solutions and partnerships with local communities to preserve river basins, reflecting a "watershed-first" approach that recognizes that operational efficiency alone cannot solve systemic water scarcity.¹⁶

Circular Economy and Sustainable Packaging

The "Circular Packaging" commitment aims for 100% of products to be sold in packaging that is either returnable or made from majority recycled content by 2025.⁴ This is a multi-dimensional challenge involving glass, aluminum, and plastic. In the aluminum sector, the company benefits from Brazil's exceptionally high recycling rates, which reached 98.9% in 2023.²¹

However, plastic pollution remains a focus area. In 2023, Ambev announced a partnership with Avantium to import PEF (polyethylene furanoate), a 100% plant-based and recyclable plastic alternative.¹⁷ This innovation is intended to enable 100% recyclable PET bottles across the company's portfolio, moving the needle toward its zero-plastic-pollution target.¹⁷

Social Impact and Human Capital Management

Ambev's social agenda has transitioned from traditional philanthropy to a "productive inclusion" model. This model seeks to leverage the company's massive scale to create economic opportunities for underrepresented groups and small business owners within its ecosystem.

Diversity, Equity, and Inclusion (DE&I)

The company has established quantitative targets for ethnic and gender representation in leadership. In 2021, 22% of leadership positions in Brazil were held by Black employees, a key metric in the organization's efforts to combat systemic inequality.¹⁰ Gender diversity has also seen consistent improvement; by 2022, 35% of the salaried workforce were women, compared to 30% in 2017.⁴

The organization's commitment to gender equality was recognized with the "Silver seal" for the Women's Empowerment Principles (WEPs) in Brazil and a "Gold" category ranking in Chile in 2021.¹⁰ These external recognitions serve as indicators of the company's progress in integrating DE&I into its corporate culture.¹⁰

Productive Inclusion and the "Bora" Project

In 2022, Ambev launched the "Bora" project, an initiative designed to productively include 5 million people in the economic world by 2032.¹⁷ This project focuses on increasing access to skills, technology, and capital for individuals within the company's value chain, including recycling collectors, small-scale farmers, and micro-entrepreneurs.¹⁷

The BEES B2B platform plays a crucial role in this social strategy. By empowering over 3.1 million small retailers in 20 countries with digital tools and management training, the company aims to narrow the digital and financial inclusion gaps in vulnerable communities.⁴ In 2023, BEES captured \$39.8 billion in gross merchandise value, reflecting its scale as a tool for economic empowerment.¹⁹

Smart Drinking and Consumer Wellness

As a producer of alcoholic beverages, Ambev carries a significant responsibility for promoting moderation. Its "Smart Drinking" goals include multi-year investments in social norms marketing, which totaled \$700 million between 2016 and 2022.⁴ The company also utilizes product innovation as a social tool, expanding its "No and Low" alcohol (NoLo) portfolio with products like Budweiser Zero to provide consumers with responsible alternatives.⁴

Governance, Ethical Standards, and Material Controversies

The "Governance" pillar at Ambev is shaped by its status as a subsidiary of AB InBev and a Category A issuer in Brazil. While the company maintains robust internal controls and ethical codes, it has faced notable controversies that impact its ESG ratings and reputation.

Ethical Framework and Oversight

Ambev's governance is guided by a Global Human Rights Policy and a Code of Business Conduct that explicitly prohibit forced labor and child labor.²² The Board of Directors and the Fiscal Council provide oversight, while specialized committees for Sustainability and Audit monitor ESG performance.¹⁰ The organization's reputation for governance was reflected in its second-place ranking in the Merco Brazil Corporate Reputation index in 2021.¹⁰

Labor and Human Rights Controversies

Despite its rigorous policies, Ambev has been linked to significant labor violations within its supply and distribution chains.

- **Salvador Carnival (2023):** The Brazilian Ministry of Labor exposed conditions "similar to slavery" involving over 300 workers hired to sell Ambev products at the Salvador Carnival. The investigation found that workers were deprived of proper accommodation, adequate food, and sanitary facilities.²⁴
- **Subcontractor Violations (2021):** Labor inspectors rescued 23 workers, including 22 Venezuelans and one Haitian, from modern slavery conditions while working for a subcontractor shared by Ambev and Heineken. These workers lived in their trucks and lacked access to basic hygiene.²⁴

These incidents suggest a "management gap" in the oversight of third-party logistics and informal labor networks, a critical risk factor for companies with extensive distribution systems in emerging markets.

Antitrust and Competition Litigation

Ambev's dominant market position has frequently brought it into conflict with antitrust regulators. A significant historical milestone was the 2015 settlement with the Administrative Council for Economic Defense (CADE). The agency had imposed a fine of R

352.7millionin2009, whichwaseventuallysettledforR 229.1 million after the company successfully litigated material errors in the calculation basis.²⁵ While this occurred earlier in the decade, the prolonged nature of such litigation highlights the ongoing governance and legal risks associated with competition policy.²⁵

Environmental Fines and "Greenwashing" Accusations

While Ambev is a leader in environmental disclosure, it has not been immune to regulatory penalties. Reports indicate that the company is among the top 10 Brazilian firms with the most fines from IBAMA in the last 25 years.²⁶ Furthermore, some sustainability-focused marketing campaigns have been criticized as "greenwashing" by organizations that claim high-level influencer partnerships and digital advertising are used to amplify messaging that is not always supported by localized environmental investment.²⁶

External ESG Ratings and Third-Party Assurance

External ratings provide an independent assessment of how well Ambev manages its material ESG risks. These ratings are used by institutional investors to benchmark the company against global and regional peers.

MSCI and Morningstar Sustainalytics

MSCI ESG Ratings consistently categorize Ambev as an organization with robust risk management, frequently placing it in the "A or higher" category in its regional indices.²⁷ MSCI focuses on industry-relative letter ratings (AAA to CCC).²⁸

Morningstar Sustainalytics provides an "ESG Risk Rating" that measures the degree of unmanaged risk. As of early 2026, Ambev's score was recorded at 21.25 to 21.61, indicating a "Medium Risk" level.⁷ Sustainalytics identifies a "management gap" caused by controversies as a factor that prevents the company from achieving a "Low Risk" designation.³⁰

S&P Global and the Corporate Sustainability Assessment (CSA)

Ambev's S&P Global ESG Score is currently 39, with a CSA Score of 34.³² It is critical to note that this score is based on publicly available information and modeling approaches rather than the company's active participation in the CSA questionnaire.³² This distinction often leads to a more conservative score compared to participating peers who provide exhaustive internal documentation.³²

Agency	Score / Rating	Status	Key Risk Areas	Source
Sustainalytics	21.25 (Medium)	As of Jan 2026	Water use, occupational health, and product impact.	⁷
S&P Global	39 (ESG Score)	Non-Participating	Modeling-based assessment of beverage industry risks.	³²
MSCI	A or Higher	Historical	Relative performance in	²⁷

		Average	the Brazilian capital market.	
CDP	Double A	2022 Achievement	Transparency in climate and water security.	⁴

Independent Data Assurance

While Ambev's financial statements are audited by global firms (e.g., PwC reviewed the 3Q25 interim statements), only specific portions of its ESG data undergo external verification.¹⁹ In the 2022 and 2023 reports, for example, approximately \$331 million to \$472 million of social investment and environmental figures were validated by an independent external auditor, while the remainder were listed as "under review" or subject to internal validation only.⁴ This highlights a broader industry challenge: the transition from "limited assurance" to "reasonable assurance" for non-financial data is still ongoing.

Reference Table with Credibility Assessment

The following table details the primary and secondary sources used in this analysis, evaluated according to their authority, transparency, and relevance.

#	Reference (APA 7th edition format)	Source Type	Credibility Score (0–10)	Justification for Score	Relevance to Query
1	Ambev S.A. (2017). <i>Form 20-F for the fiscal year ended December 31, 2016</i> . U.S. Securities and Exchange Commission.	Primary	10	Official regulatory filing with audited financials and standardized business descriptions.	High; foundational identity and historical data.

2	Ambev S.A. (2022). <i>Annual and ESG Report 2021</i> .	Primary	10	Comprehensive company disclosure using GRI standards; high transparency on goals.	High; source for Net Zero and water metrics.
3	Ambev S.A. (2024). <i>Annual and ESG Report 2023</i> .	Primary	10	Direct disclosure using latest GRI 2021 Standards; details circularity and plastic goals.	High; most recent performance data.
4	Morningstar Sustainalytics . (2026). <i>ESG Risk Rating Assessment: Ambev S.A.</i>	Secondary	9	Independent rating agency with transparent methodology and monthly updates.	High; provides third-party verification of risks.
5	MSCI ESG Research LLC. (2025). <i>ESG Ratings Search Tool</i> .	Secondary	9	Global leader in ESG analytics; provides industry-relative performance data.	High; history of rating evolution.

6	Movendi International. (2023). <i>Big Alcohol Exposed: Ambev and Heineken linked to modern slavery.</i>	Secondary	6	NGO report focusing on social controversies ; uses public labor inspection data.	High; provides counter-narrative to corporate reports.
7	Levy & Salomão Advogados. (2025). <i>Settlements with CADE in judicial cases.</i>	Secondary	8	Reputable legal analysis of antitrust settlements and historical fines.	Moderate; provides context on governance risks.

	difference.				
10	CAAD. (2025). <i>Briefing Note: Sustainability Claims of top Brazilian Agribusiness and Mining Companies.</i>	Secondary	6	Research briefing focusing on greenwashing; provides regulatory compliance context.	Moderate; highlights environmental compliance risks.

Transparency and Limitations

This analysis is based on research material available as of March 2026. The information provided is subject to several constraints:

1. **Assurance Gaps:** Not all ESG indicators reported by Ambev S.A. undergo independent third-party assurance. Data related to Scope 3 emissions and specific localized social impacts are often based on internal modeling and estimations, which are labeled as "under review" in official reports.⁴
2. **Paywalled Data:** Comprehensive historical ESG rating reports from firms like MSCI and Sustainalytics are typically restricted to institutional clients. This report utilizes public summaries and secondary research that references these ratings.²⁸
3. **Ongoing Legal Matters:** Information regarding labor controversies, such as the 2023 Salvador Carnival incident, is based on ongoing investigations and NGO reports. Final judicial outcomes or definitive fine amounts may not be fully resolved at the time of this report.²⁴
4. **Language Barriers:** Certain Brazilian regulatory filings (such as specific IAN forms) are only filed with the CVM in Portuguese, which may limit the accessibility of certain technical governance nuances for international analysts.²³

For those seeking to independently verify these findings, the following databases are recommended:

- **B3 S.A. - Brasil, Bolsa, Balcão:** The primary repository for Brazilian reference forms and notices to the market.
- **CDP Database:** The leading source for detailed company responses regarding climate change and water security questionnaire.
- **Ambev Investor Relations - SEC Filings:** Access to 20-F and 6-K forms that provide

standardized annual and interim reporting for the NYSE.

Comprehensive Summary of Findings

The evaluation of Ambev S.A.'s ESG profile from 2014 to 2023 reveals an organization that has deeply integrated sustainability into its corporate strategy, driven by its dual identity as a Brazilian national champion and a subsidiary of a global conglomerate. The company's environmental strategy is characterized by world-class water efficiency and an aggressive "Net Zero" transition, particularly within its direct operations in Brazil.

The primary governance and social risks for the organization lie within its vast and decentralized value chain. While corporate policies are robust, the recurrence of labor-related controversies in its distribution and event-management segments indicates a systemic challenge in enforcing these standards across third-party partners. For investors, the "Medium Risk" status assigned by rating agencies reflects this balance: high performance in carbon and water management against ongoing legal and reputational risks in the social and governance domains. The move toward IFRS-aligned disclosures in the coming years will likely force even greater transparency in these "unmanaged" areas, providing a clearer view of the organization's long-term sustainability resilience.
