

Comprehensive Analysis of ESG Disclosure and Corporate Sustainability Performance: TOA Paint (Thailand) Public Company Limited (2014–2023)

Company Identification and Strategic Context

TOA Paint (Thailand) Public Company Limited represents the dominant force in the architectural paint and coatings industry within Southeast Asia, specifically holding the position of the leading manufacturer and distributor in Thailand.¹ The company, identified primarily by the stock ticker symbol TOA on the Stock Exchange of Thailand (SET) and TOA.BK in international financial databases such as Reuters and Bloomberg, was established as a family-run business in 1964 by the Tangkaravakoon family.¹ Over the subsequent six decades, it evolved from an importer of Japanese paint products into a multi-national industrial conglomerate with a presence spanning Thailand, Vietnam, Laos, Myanmar, Cambodia, Indonesia, and Malaysia.²

The legal name of the entity is TOA Paint (Thailand) Public Company Limited, which achieved its current status through a conversion from a private to a public limited company in March 2017.¹ This transition was a critical prerequisite for its Initial Public Offering (IPO) and subsequent listing on the SET on October 10, 2017.¹ The company is headquartered at 31/2 Moo 3, Bangna-Trad Road, Bang Sao Thong Subdistrict, Samut Prakan Province, 10570, Thailand.⁹ Within the Stock Exchange of Thailand's classification system, the company is situated in the Property & Construction industry group and the Construction Materials sector.⁷ Other financial analytical platforms categorize it within Specialty Chemicals or Commodity Chemicals, reflecting the technical nature of its manufacturing outputs.⁵

The primary business activities of TOA Paint (Thailand) PCL encompass a broad range of architectural and industrial coatings. This includes decorative paints (acrylic emulsions, enamels, and primers), non-decorative coatings (construction chemicals, heavy-duty coatings, and wood coatings), and related building materials such as gypsum board, tile adhesives, hardware, and power tools.³ Its market dominance is evidenced by a 48.7% share of the Thai domestic paint market and a roughly 13% share of the broader ASEAN market as of current industrial benchmarks.²

Attribute	Descriptive Data	Reference Source
-----------	------------------	------------------

Legal Entity Name	TOA Paint (Thailand) Public Company Limited	3
Ticker Symbol	TOA (SET), TOA.BK (Reuters/EODHD)	3
Headquarters	31/2 Moo 3, Bangna-Trad Road, Samut Prakan, Thailand	9
Market Classification	Property & Construction / Construction Materials	7
Secondary Sector	Specialty Chemicals / Materials	5
Core Business	Manufacture/Distribution of Paints and Chemicals	3
Listing Status	Publicly Held (Listed on SET since Oct 10, 2017)	1
Employees	Approximately 3,730 to 4,492 (Consolidated)	5

The identification of this entity is confirmed across multiple primary and secondary financial authorities. The Stock Exchange of Thailand provides the most granular regulatory data, while platforms like FT Markets, Pitchbook, and Investing.com verify the company's regional scale and operational breadth.⁷

ESG Report Timeline Analysis (2014–2023)

The decade between 2014 and 2023 serves as the foundational period for the company's transition from an informally managed private enterprise to a standardized, ESG-compliant public corporation. This timeline can be analyzed through three distinct phases: the pre-listing preparatory phase, the post-IPO compliance phase, and the sustainability maturation phase.

Phase I: Pre-Listing and Governance Integration (2014–2016)

During the early part of this decade, TOA Paint (Thailand) operated as a private entity focused on regional expansion. In 2014, the company established key joint ventures and subsidiaries in

Myanmar (TOA Paint Myanmar Company Limited) and Thailand (Imagica Co., Ltd.), laying the groundwork for a broader ASEAN manufacturing footprint.⁶ While formal ESG reporting was not standard during this period, the company was already integrating operational efficiency and regional market dominance into its strategy.

The most critical development occurred in March 2016, when the company completed a comprehensive Corporate Reorganization.⁶ This process was essential for standardizing the internal management systems and financial disclosures required for public scrutiny. It was during this time that the foundations for professionalized governance were laid, including the initial steps toward board-level oversight that would eventually evolve into the Corporate Governance and Sustainability Committee.¹

Phase II: Post-IPO and Compliance Foundations (2017–2019)

The conversion to a Public Limited Company on March 24, 2017, and the subsequent SET listing on October 10, 2017, inaugurated a new era of mandatory transparency.¹ The company began filing Annual Reports and Form 56-1 Annual Registration Statements, which provided the first public glimpses into its sustainability-related activities, although these were initially integrated within general operational disclosures.²⁰

In 2018 and 2019, the company focused on achieving industrial certifications that validated its internal standards. This included occupational health and safety benchmarks and labor relations awards, reflecting a nascent focus on the 'Social' and 'Governance' aspects of ESG.²² During this phase, the company's reporting largely adhered to the SEC's requirements for listed companies, prioritizing financial integrity and shareholder communication.²⁰

Phase III: Maturation and Framework Adoption (2020–2023)

The turn of the decade marked a pivotal shift toward quantified and framework-aligned sustainability disclosure. This period saw the company align with international reporting standards and establish long-term climate commitments.

- **2020: Sustainable Stock Designation:** TOA Paint was selected for the first time as a constituent of the Thailand Sustainability Investment (THSI) list.⁶ This recognition by the SET signaled that the company's ESG practices met the threshold for inclusion in a dedicated sustainability index, marking its debut as a recognized sustainable asset in the Thai market.⁶
- **2021: GHG Baseline and Product Innovation:** This year represented a scientific turning point for the company's environmental strategy. TOA Paint conducted its first comprehensive assessment of greenhouse gas (GHG) emissions across Scope 1, 2, and 3.²⁶ This established the 2021 baseline necessary for future reduction targets and was verified by the Thailand Greenhouse Gas Management Organization (TGO) for its primary factories.²⁶ Simultaneously, the company launched "TOA Organic Care," Thailand's first plant-based interior paint, demonstrating the integration of circular economy and

health-conscious design into its R&D cycle.²⁶

- **2022: Formal GRI Reporting:** TOA Paint published its 2022 Sustainability Report (also referred to as the 56-1 One Report Sustainability section) in accordance with the Global Reporting Initiative (GRI) Standards.²³ This was not the company's first year of sustainability activity, as disclosures in the report mentioned performance data for the "3rd consecutive year" or "11 consecutive years" in specific areas like corporate governance and safety awards, but it was a milestone in standardizing the *format* of the reporting.²³ The company also registered its Carbon Footprint for Organization (CFO) and Carbon Footprint of Products (CFP) during this cycle.²³
- **2023: Regulatory Milestones and Net Zero Commitment:** As the SET transitioned the THSI list into the "SET ESG Ratings," TOA Paint achieved a Level 'A' rating.⁶ The company formalized its commitment to achieving Net Zero greenhouse gas emissions by 2050, with a short-term target of reducing Scope 1 and 2 emissions by 50% by 2030.¹ The 2023 Sustainability Report further refined its disclosures by adopting the GRI 3: Material Topics 2021 framework to identify 16 material sustainability issues.²⁶

Year	Milestone / Development	Relevance to ESG Profile	Source
2016	Comprehensive Corporate Reorganization	Prepared the management structure for public listing and governance standards.	⁶
2017	IPO and SET Listing (Oct 10)	Initiated mandatory disclosure of financial and non-financial performance data.	¹
2018	Annual Report 2017 Publication	First public filing under the SET and SEC regulatory frameworks.	²⁰
2020	First inclusion in Thailand	Validated as a sustainable	⁶

	Sustainability Investment (THSI) list	investment by the Stock Exchange of Thailand.	
2021	Establishment of 2021 GHG Baseline (Scopes 1-3)	Created the data infrastructure for climate performance and Net Zero roadmapping.	26
2021	Launch of "TOA Organic Care" product	Integrated sustainability into the core product value proposition and R&D.	26
2022	Publication of GRI-aligned Sustainability Report	Formal adoption of the world's most widely used sustainability reporting standards.	23
2022	Achievement of 5-star Excellent Corporate Governance rating	Recognized for excellence in governance by the Thai Institute of Directors (IOD).	23
2023	Achievement of Level 'A' in the SET ESG Ratings	Demonstrated consistency in sustainability performance in the SET's updated ranking system.	6
2023	Announcement of Net Zero 2050 Roadmap	Aligned corporate strategy with the Paris Agreement	1

		and global climate goals.	
--	--	---------------------------	--

Environmental Performance and the 7-GREEN Strategy

The environmental pillar of TOA Paint’s ESG framework is dominated by its "7-GREEN" strategy, which serves as an operational roadmap for mitigating the significant ecological footprint associated with chemical manufacturing and distribution.¹ This strategy moves beyond traditional pollution control to incorporate lifecycle-based environmental management.

Climate Change Governance and Net Zero Trajectory

The company's climate strategy is overseen at the highest level of leadership. Two senior executives, CEO Jatuphat Tangkaravakoon and Senior Vice President of Operations Winai Chaiburannont, have been specifically assigned to govern climate-related risks and strategic responses.²⁶ This governance structure ensures that decarbonization targets are integrated into operational budgeting and long-term planning.

The 2050 Net Zero ambition is supported by intermediate performance indicators. Following the 2021 baseline, the company has tracked its greenhouse gas emissions in metric tons of *CO₂* equivalent (*tCO₂eq*). Direct and energy-indirect emissions have shown a downward trend as energy efficiency measures take hold.

Emission Category	2021 (Baseline)	2024 (Latest Reported)	Trend Analysis
Scope 1 (Direct)	8,627 <i>tCO₂eq</i>	7,357 <i>tCO₂eq</i>	-14.7% reduction
Scope 2 (Energy Indirect)	8,662 <i>tCO₂eq</i>	6,566 <i>tCO₂eq</i>	-24.2% reduction
Scope 3 (Value Chain)	250,247 <i>tCO₂eq</i>	234,281 <i>tCO₂eq</i>	-6.4% reduction

Total GHG Emissions	267,536 <i>tCO₂eq</i>	248,204 <i>tCO₂eq</i>	-7.2% overall reduction
----------------------------	----------------------------------	----------------------------------	-------------------------

The data above shows that while total emissions are down, the vast majority of TOA’s carbon footprint (over 94% in 2024) resides in Scope 3.²⁶ This highlights the company's critical dependence on the sustainability of its raw material suppliers and downstream distribution logistics. To address this, the company has integrated ESG assessments into its supply chain management, conducting on-site evaluations of suppliers' environmental practices.²⁶

Energy and Resource Management Standards

Operational sustainability is anchored in adherence to international management standards. The company maintains 100% ISO 14001 certification for its Thai factories, requiring systematic identification and mitigation of environmental impacts.²⁶ Furthermore, it has adopted the ISO 50001 Energy Management System standard to drive systemic reductions in power consumption.²⁶

In 2024, the company reported a reduction in electricity consumption by 2,088,138 kWh per year, which directly translated to a mitigation of 926 *tCO₂eq*.²⁶ A primary driver of this performance has been the deployment of Solar Rooftops across manufacturing facilities, providing a renewable source of energy that offsets grid dependence.²⁶

Water and waste management initiatives are similarly rigorous. The company has set a goal of "Zero Waste to Landfill by 2030".²⁶ Circular economy projects include reprocessing gypsum ceiling waste (achieving a 13.26% reprocessing rate) and a uniform recycling initiative.²⁶ Regarding water, TOA Paint reused 10,212.60 cubic meters of wastewater in 2024 and utilizes advanced nanofiltration to ensure effluent quality remains at 50% below legal Chemical Oxygen Demand (COD) limits.²⁶

"TOA Greenovation": Sustainable Product Lifecycle

Innovation at TOA Paint is guided by the "CLEAN – GREEN – SAVE" philosophy.²⁶ This involves substituting hazardous chemicals with safer alternatives and designing products that enhance user health and energy efficiency.

The launch of the "TOA GREEN CERTIFIED" mark signifies that a product meets at least four specific sustainability criteria, such as low VOC content, high durability, or the absence of heavy metals like lead, mercury, and cadmium.²⁸ The company has aggressively pursued environmental labeling to improve market transparency:

- **Carbon Footprint of Products (CFP):** 318 products registered by 2024.²²

- **Carbon Footprint Reduction (CFR):** 131 products registered, which the company claims is the highest in the architectural coating sector.²²
- **Green Label:** 69 products certified.²⁶

Specific products like "TOA Shield Expert" demonstrate these principles in practice. It is a water-based, 2-in-1 innovation that eliminates the need for water mixing and separate primer application, thereby reducing resource waste and shortening project durations, which contributes to lower total carbon emissions during the application phase.²²

Social Performance and Human Capital Management

TOA Paint's approach to the social dimension of ESG is characterized by a strong emphasis on workplace safety, human rights due diligence, and community-centric CSR programs.

Human Rights and Fair Labor Practices

The company codified its commitment to human rights in a comprehensive Human Rights Policy that aligns with the UN Guiding Principles on Business and Human Rights and the ILO Declaration on Fundamental Principles.¹⁷ The policy, which applies to all subsidiaries worldwide, emphasizes non-discrimination, equal opportunity, and the elimination of forced or child labor.¹⁷

A key mechanism for ensuring labor rights is the support for freedom of association. Employees are encouraged to form welfare committees, which serve as formal platforms for negotiating benefits and working conditions.¹⁷ In the 2024 reporting cycle, TOA Paint reported zero cases of human rights violations, child labor, or discrimination.¹⁷

Employee care and development are tracked through specific performance indicators:

- **Staffing:** As of December 31, 2024, the company employed 3,730 people, with 593 new hires during the year.¹⁷
- **Training:** An average of 9.62 development hours were provided per employee across 130 training programs.²⁶
- **Engagement:** The annual Employee Engagement Survey yielded a score of 83%, surpassing the 75% target.¹⁷

Occupational Health and Safety Standards

Safety is a non-negotiable aspect of TOA Paint's industrial operations. The company has achieved ISO 45001:2018 certification across 100% of its operational areas, reflecting a standardized approach to occupational health and safety.¹⁷ Its proactive risk management follows the "Hierarchy of Controls" (Elimination, Substitution, Engineering Controls, Administrative Controls, and PPE).¹⁷

This focus on safety has resulted in measurable performance outcomes, such as a Lost Time Injury Frequency Rate (LTIFR) of 0.23 for employees and zero for contractors in 2024.²⁶ Historically, the company has received the Outstanding Safety Award for nine consecutive years as of 2022.²³

Community Development and Disaster Response

The company maintains a significant social presence through its community investment activities. In 2024, it allocated THB 125.3 million to community projects, with focus areas including education, skill development for technical industrial teachers, sports promotion, and urban living development.²⁶

Disaster response serves as a critical component of TOA's social responsibility. During the northern Thailand floods of 2024, the company launched the "TOA Never Leave Each Other Behind" initiative to provide aid to affected communities.²² Furthermore, the company has received the CSR-DIW Continuous Award from the Department of Industrial Works for ten consecutive years (2015–2024), indicating a sustained level of commitment to local community welfare.²²

Governance Excellence and Risk Management

TOA Paint's corporate governance framework is designed to ensure accountability, protect the rights of minority shareholders, and integrate sustainability into the core decision-making process.

Board Composition and Ethics Governance

The Board of Directors is the ultimate governing body for ESG at TOA Paint. As of 2024, the Board consisted of six directors, 50% of whom were independent.¹⁹ This exceeds the SEC's requirement for a one-third proportion of independent directors, providing a stronger check on executive decision-making.

Ethical behavior is mandated through the "Corporate Governance and Business Ethics Handbook".¹⁹ The company reported that 92.16% of its workforce completed and passed ethics training and assessments in 2024.¹⁹ Governance transparency is further bolstered by a "No Gift Policy" and a secure whistleblowing system that allows stakeholders to report illegal acts, corruption, or human rights violations directly to the internal audit department for independent investigation.²⁸

Enterprise Risk Management and Business Continuity

The company has integrated ESG risks into its enterprise risk management (ERM) matrix, treating sustainability issues with the same level of analytical rigor as financial or strategic

risks.²⁸ Quarterly risk assessments are reported to the Audit Committee and the Board.¹⁹

A significant development in governance maturity was the establishment of the Business Continuity Management (BCM) Committee in 2024.²⁶ This committee oversees the updating of business continuity plans to the ISO 22301 standard, ensuring the company can navigate crises—such as northern Thailand’s floods or geopolitical turmoils in the Middle East—without significant disruption to its critical resources or stakeholder commitments.²⁶

Supply Chain and Customer Responsibility

Supply chain governance is managed through a "Supplier Code of Conduct" that extends TOA’s environmental and social standards to its business partners.²⁶ Suppliers are subjected to ESG-integrated risk assessments and on-site evaluations to ensure they do not compromise TOA’s sustainability profile.²⁶

Customer responsibility is reflected in the company's responsiveness to feedback. In 2024, TOA Paint achieved a 100% resolution rate for customer complaints within 24 hours.²⁶ These efforts have contributed to the brand being recognized as "Thailand's No. 1 Favorite Paint Brand" for 12 consecutive years.²⁶

Peer Benchmarking and Sector Context

TOA Paint operates in a competitive chemical materials landscape. A comparative analysis of its performance metrics against regional and industry peers reveals its relative position within the Construction Materials sector and Specialty Chemicals sub-industry.

Metric (TTM 2025/2026)	TOA Paint Thailand	Jenkem Technology	Ishihara Sangyo Kaisha	MEC Co Ltd	Orinko Advanced
Revenue (Billions)	21.59 (THB)	1.16	30.32	4.22	30.03
Net Profit Margin (%)	13.65%	15.04%	10.97%	24.01%	3.22%

ROE (%)	20.7%	40.56% (5yr avg)	6.13%	18.49%	2.48%
P/E Ratio	8.43 - 8.57	165.36	7.41	27.43	27.93
Current Ratio	3.03	8.39	1.48	3.93	1.10
SET ESG Rating	A / AAA	N/A	N/A	N/A	N/A

The data indicates that TOA Paint maintains a healthy balance between profitability and liquidity, with a Current Ratio of 3.03 ensuring significant short-term financial resilience.⁹ While some chemical peers in high-growth segments like Jenkem have higher ROE or net margins, TOA's valuation (P/E ~8.5) is notably lower, potentially reflecting the more mature nature of the architectural paint market or local market dynamics on the SET.⁹

ESG Ratings, Assurance, and Recognitions

The credibility of TOA Paint's ESG disclosures is supported by a history of external validations from recognized national and regional authorities.

External ESG Ratings History

The company's performance in sustainability indices has shown consistent upward momentum.

- **SET ESG Ratings (Stock Exchange of Thailand):** After being listed on the Thailand Sustainability Investment (THSI) list from 2020 to 2022, the company successfully transitioned to the new SET ESG Ratings system in 2023, where it was initially ranked at Level 'A'.⁶ Recent exchange data as of early 2026 shows an upgrade or a top-tier positioning at Level 'AAA' in some reporting segments.¹¹
- **MSCI and Sustainalytics:** TOA Paint is a constituent of the SET100 and SETESG indices and is covered within the global universes of MSCI and Sustainalytics.¹¹ While detailed historic scoring is often proprietary, current analysis suggests the company holds an "Average" or "Low-Medium Risk" profile within its peer group, consistent with its strong local ratings.³⁶
- **Corporate Governance Survey (Thai IOD):** The company has received the highest

"5-star" (Excellent) rating from the Thai Institute of Directors for six consecutive years (2019–2024).²²

- **AGM Quality Evaluation (TIA):** Achieving "perfect scores" for its Annual General Meetings from the Thai Investors Association for six consecutive years (2019–2024) highlights its commitment to shareholder engagement transparency.²²

Third-Party Assurance Status

A critical review of the 2023 Sustainability Report reveals a transparency gap regarding broad third-party assurance. The GRI Content Index for GRI 2 (General Disclosures) and GRI 3 (Material Topics) contains dashes ("-") in the external assurance column, signifying that these qualitative sections were not independently verified by a third-party auditor.²⁸

However, the company has adopted a more targeted assurance strategy for high-impact environmental data. Its 2024 Greenhouse Gas Emissions data was independently verified by ECEE Co., Ltd. in accordance with ISO 14064-3 and the requirements of the Thailand Greenhouse Gas Management Organization (TGO).²⁶ This ensures that the data underpinning the Net Zero 2050 target is scientifically sound, even if the broader sustainability narrative remains self-reported.

Notable ESG Awards and Recognitions

- **Climate Action Leading Organization (CALO) Award 2024:** Received the award at the highest level in the Property Development and Construction category for its decarbonization initiatives.²²
- **Best Innovative Company (SET Awards 2023):** Recognized for the "TOA AQUA SHIELD" watercolor innovation, which emphasizes health safety and environmental protection.⁶
- **ASEAN Asset Class PLCs Award (2024):** Recognized for excellence in the ASEAN Corporate Governance Scorecard for the third consecutive year.³⁸
- **CSR-DIW Continuous Award:** Received for ten consecutive years from the Department of Industrial Works for excellence in industrial social responsibility.²²

Transparency and Limitations

Knowledge Cutoff and Data Availability

This report is based on research materials and publicly available disclosures accessible as of March 2026. While exhaustive in its detail, several limitations must be acknowledged:

- **Audit Lags:** Complete audited financial and sustainability reports for the 2025 fiscal year may not be fully finalized in all categories until later in the 2026 reporting cycle. This analysis uses the most current available data points from exchange factsheets and board-approved reports from early 2025 and 2026.¹¹
- **Proprietary ESG Scores:** Detailed, indicator-level risk reports from agencies like MSCI and ISS ESG are proprietary and often restricted to paying terminal users. This report relies

on public summaries, index inclusion data, and third-party methodology documents provided by these agencies.³⁶

- **Assurance Gaps:** As identified in the 2023 GRI Content Index, the lack of broad third-party assurance for qualitative ESG narratives means that some claims regarding social impact and community relations are based on the company's self-reported data.²⁸

Identified Data Gaps

The search for specific historic letter grades from MSCI or Sustainalytics for early years (e.g., 2014–2016) was limited by the company's private status during that period. Consequently, information regarding external ESG ratings for those years is categorized as "No verifiable information found" because the company was not yet subject to the public market scoring systems of major agencies.⁶

Recommendations for Further Verification

Users seeking to update or cross-reference this information are encouraged to utilize the following authoritative external databases:

Conclusion: Strategic Trajectory and Future Outlook

The analysis of TOA Paint (Thailand) Public Company Limited from 2014 to 2023 reveals a robust and strategic alignment with ESG principles. The company has successfully evolved from a regionally focused manufacturer into a leader in sustainability disclosure within the Thai materials sector. Its primary strengths lie in the integration of environmental innovation into its product R&D through the "Greenovation" initiative and its early adoption of quantified GHG emissions tracking across all three scopes.

Looking forward, the company faces two primary challenges: achieving its ambitious 2030 and 2050 carbon reduction targets and addressing the significant emissions identified in its Scope 3 value chain. The company's focus on solar energy and supplier ESG assessments suggests a viable pathway, but continued success will depend on its ability to maintain its high governance standards and transparency in an increasingly scrutinized global regulatory environment. Its current 'A' to 'AAA' standing in local benchmarks indicates a strong foundation, but the path to

Net Zero will require sustained operational transformation in the coming decade.
